

# Rotavapor® R II

## Standard in evaporation

The R II fulfills fundamental needs of classical laboratory evaporation applications without compromising on quality and safety.

### Durable

High longevity due to exclusive use of high quality material

### Easy to use

Easy operation with the quick-action jack and manual lift

### Customizable

Several glass assemblies and accessories available

## R II: Your most important benefits

### Durable

- High longevity due to its sturdy construction and powder coated aluminum housing
- Reliable operation thanks to robust design and hand lift
- No thermal overload due to heat dissipation

### Easy to use

- Easy flask and vapor duct removal thanks to the multifunctional Combi-Clip
- Easy handling thanks to proven design and quick-action jack
- Fast and easy cleaning thanks to quick removal of cordless bath

### Customizable

- Various glass assemblies and accessories available (e.g. protective shield, valve unit)
- Covers further needs with a wide range of complementary products (e.g. vacuum pump)
- Achieves even better results with the BUCHI vacuum controller

## Complete your portfolio

Vacuum Pump  
V-700  
The economical  
vacuum source

Vacuum Controller  
V-850 / V-855  
Achieve best process  
performance

Recirculating Chiller  
F-100  
The easy way of cooling

Melting Point  
M-560 / M-565  
Determination of  
melting point
