

Interface I-100

Economical vacuum regulation

The I-100 is an easy to use interface to regulate the vacuum conveniently. As the central interface of the “Rotavapor® Essential” solution it increases the efficiency of the evaporation process.

Economical
Designed to meet essential needs

Convenient
Allows intuitive and proven operation

Reliable
Precise and well-established vacuum regulation

I-100: Your most important benefits

Economical

- Functional design fulfills essential needs of vacuum regulation
- Saves resources as it controls the vacuum pump
- High longevity due to robust and durable design

Convenient

- User-friendly and intuitive handling thanks to self-explaining user interface
- Easy and accurate vacuum regulation
- Relevant information is displayed at a glance

Reliable

- High reliability due to centralized control of process parameters
- Full process control thanks to parameter monitoring
- Proven technology for major applications

Complete your portfolio

Rotavapor®
R-100
Economical evaporation

Vacuum Pump
V-100
Economical
vacuum source

Recirculating Chiller
F-100 / F-105
The easy way of cooling

Multivapor™
P-6 / P-12
Efficient evaporation
for multiple samples
